Subject: No TeraWulf Data Center

As a resident of Tompkins County, I am shocked and appalled to learn that Lansing may be a future site for a data center.

The negative impacts these centers have on the communities and environments are astronomical. Read any first-hand account from someone who has lived this reality and you'll understand that this serves no one other than the profit margins of millionaires and billionaires.

I know I am one of many voices. I urge you to listen to us. Please protect this county from this devastating reality and choose NO data center.
